Shallow Pot 28 cm Berlinger Haus BH-7090

- Material: forged aluminum with black non-stick coating
- Shallow pot with lid Ø28*7,5 cm 3,8L
- Color: matt black
- Forged aluminium thick wall body material
- Ergonomic Soft-touch handle
- FULL induction based
- Suitable for all type of hobs including Induction hob (Energy saving!)
- Elegant design
- ECO friendly
- PFOA, LEAD, Cadmium free
- Easy to clean (Made from efficiently and hygienically materials!)

This elegant shallow pot from our Monaco Collection is made of forged aluminum thick wall body material and a 3-layer non-stick titan coating.

The high-quality materials used provide excellent thermal conductivity and allow the food to be cooked evenly on all sides. The triple layer of the titan coating makes the non-stick coating three times more durable and the food won't burn or stick. The ergonomic soft-touch handle offers a good grip and safe cooking as it does not get hot during cooking. The pot is stylish and attractive with its dark grey color with black shadow and shining hammer effect.

All products from the Monaco Collection are free from harmful substances as are PFOA, Lead, and Cadmium free. The cookware set is suitable for all hob types including induction hobs. The turbo induction bottom allows the food to be cooked with less energy and still achieve the same great results. Following the care and cleaning instructions will ensure the longevity and durability of the product and you will enjoy its use for years to come.

Maintenance instructions before its first use:
Wash the pot before its first use. Carefully wash and rinse the cookware with a mild detergent and water. Next, dry the cookware with a soft towel. Treat the coating with a little vegetable oil and wipe off the excess. This procedure preserves the effectiveness of the non-stick coating.

Cleaning instructions:
After cooking, leave the cookware to cool down to room temperature. Do not try to cool down by pouring cold water into the cookware.

Use a mild detergent and a soft scourer. Ideally, do not use abrasive cleaning products. The product is dishwasher safe, however, hand washing will prolong the product's life and will preserve the intensity of the color. Do not use a metal scourer when washing or metal utensils for cooking to prevent damaging the non-stick coating.
